THE VESSEL

The *flagship of the Cobalt line* — twin power, a deep-vee hull, and a proven Pacific Northwest track record.

The Cobalt 293 is the flagship of the legendary Cobalt line — a deep-vee fiberglass cruiser built with Hydrolam construction and a Kevlar-reinforced keel for confident performance in Pacific Northwest water. Dub Sea is maintained, turn-key, and comes trailer-ready.

Twin MerCruiser 350 MAG MPI stern drives deliver 600 horsepower with 780 hours logged, moving the 29-foot hull with the ease Cobalt is known for. A roomy cuddy cabin offers weekend-ready shelter below, while the open cockpit seats a crowd for a day on the Sound.

A tri-axle trailer is included, making haul-out, storage, and trailering to new water effortless. Cared for and ready to run — sea trial welcome.

VESSEL HIGHLIGHTS
