THE VESSEL

A *no-expense-spared refit* — over $400,000 invested in a classic Trojan flybridge cruiser.

Blue Pearl is a 1987 Trojan 10.8 Meter International lying in Anacortes, Washington — the gateway to the San Juans and one of the best-placed home ports in the Pacific Northwest. The 10.8 Meter International was Trojan's take on the classic American flybridge cruiser: a wide, stable hull, a genuinely usable aft cockpit, and an interior that lives far larger than its 35 feet suggest.

What sets this particular boat apart is what has been put into her. The current owner has invested over $400,000 rebuilding and upgrading the vessel — effectively every inch of her — sparing no expense along the way. That figure is multiples of the asking price, and the work is documented rather than described: a new 350-gallon fuel tank, a new Sterling inverter system, a ProMariner battery charging system, a new Isotemp water heater, new Garmin chartplotter and sonar, and an automatic Halon fire-suppression system in the engine room.

Power is a pair of Crusader 350hp 7.4L V8 gas engines showing just 919 hours — genuinely low time. The systems work that matters most on a gas boat of this age has been done: new exhaust risers, elbows and Ts, plus updated distributors, plugs and wires. Running gear has had the same treatment — dripless shaft seals, a new strut and bushings, and new Nibral propellers, with a spare set of Nibral props plus prop and hub pullers included in the sale.

The refit runs right through the boat: new high-pressure water pump and plumbing, new faucets, new LED lighting and hardware, new bilge pumps and horn, new antennas on polished stainless mounts, a new tender, and new upholstery, canvas, carpet and flooring throughout. Aboard, the layout runs from a full flybridge helm down through a bright salon and dinette, into a galley set below, with a private stateroom and enclosed head forward. This is not a list of deferred jobs dressed up as maintenance history — it is a boat that has already had the money spent on her, and she is ready to cruise the San Juans today.

VESSEL HIGHLIGHTS

— Over $400,000 invested — rebuilt throughout	— Twin Crusader 350hp 7.4L V8 gas — 919 hours
— New exhaust risers, elbows & Ts	— Updated distributors, plugs & wires
— New 350-gallon fuel tank	— Automatic Halon fire suppression — engine room
— New Sterling inverter system	— New ProMariner battery charging system
— New Garmin chartplotter & sonar	— New Isotemp water heater
— Dripless shaft seals, new strut & bushings	— New Nibral props + spare set & pullers included
— New high-pressure water pump, plumbing & faucets	— New LED lighting, antennas & stainless hardware
— New upholstery, canvas, carpet & flooring	— New bilge pumps, horn & tender
— Lying Anacortes, WA — San Juans on your doorstep
